Temporary wives were very common in Japan at the end of the 19th century. In the mid-1800's, the West, led by the United States, had established diplomatic and commercial relations with the country, and the fascination with the home of the geishas had spread like gunpowder. In this line, the character of Butterfly is a crude embodiment of the conflict between two irreconcilable civilizations, one of which subjugates the other. A man of very fine theatrical instinct, Puccini masterly portrays the fragility of a geisha in love, who naively believes she is reciprocated by a handsome officer of the United States Navy, in a score which evokes conveniently harmonized traditional Japanese melodies. The fiasco of *Madame Butterfly's* premiere in Milan did not make the composer desist from his determination to go ahead with what he believed to be his most sincere and expressive work. Time would end up proving him right. Mario Gas places the story on a film set in the 30s and proposes

three simultaneous perspectives through which to experience this moving drama: the opera itself, the filming of the opera and its reproduction in black and white on a huge screen.
