Tito Ramirez, aka TNT Ramirez and one of the most controversial artists of recent years, put his name on the radar with his album *The kink of mambo* (2019), with which he became a benchmark of the international underground soul and R&B scene. After 5 singles and one LP, his long-awaited second album is finally here. With *El Prince* (2023), his excellency of perversity is back on the throne of his own sound universe, deepening and extending his aesthetic range with new sounds and rhythms with which he experiments for the first time. Far from a mere stylistic exercise, the personal form of his compositions and his performance make this an author's album. The singer has adopted different sounds and periods, turning this work into an extravagant journey through all his influences, such as psychedelia, Latin soul, garage, mambo, boogaloo, R&B, gospel.... His verses are like hieroglyphics that enclose messages of love, sex, substances, indecision, revenge, power and wealth. The demand for concerts by Tito Rodriguez is growing; he has become a regular presence at festivals all over the country, and at some international concerts as well, where he has even shared the bill with artists such as The Mummies (USA) and The Pretty Things (England).
